REASONS FOR ALLOWANCE

1. Claims 1 and 4 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a liquid crystal display device comprising a combination of various elements as claimed, more specifically, the first substrate is provided with a first alignment mark formed so as to be at least partially superimposed on a joined area between the sealing material and the anisotropic conductive material, and the second substrate is provided with a second alignment mark opposed to the first alignment mark through the joined area such that when the first substrate is bonded to the second substrate the sealing material is aligned with the anisotropic conductive material.

Hida ('695) discloses a liquid crystal display device comprising alignment marks. However, Hida fails to disclose 'the first substrate is provided with a first alignment mark formed so as to be at least partially superimposed on a joined area between the sealing material and the anisotropic conductive material, and the second substrate is provided with a second alignment mark opposed to the first alignment mark through the joined area such that when the first substrate is bonded to the second substrate the sealing material is aligned with the anisotropic conductive material'.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
